## web*⚡*i™

Browser Based  
Monitoring and Control of your  
CSI Building Management System

**WebGen**  
Systems™

Your Leader in Web Integration

## CSI / TAC I/NET™ Web Browser Interface

A “plug & play” solution for browser based monitoring and control of CSI/TAC building management systems

### Enterprise Wide Monitoring and Control

The CSI/TAC **web*⚡*i** is an intelligent, cost effective point of connection for integrating enhanced EMS accessibility into an enterprise wide solution for monitoring and control.

### Plug and Play Integration

The **web*⚡*i** features true “plug & play” functionality. The hardware comes pre-configured and mounted in a NEMA enclosure. Installation consists of mounting, plugging in the power source, CSI tap and TCP/IP network. The WebGen developed software tools make creating web pages for monitoring and control quick and easy.

### Integration with Other Equipment

WebGen has developed application software which allows the **web*⚡*i** to integrate dissimilar systems into a powerful enterprise wide solution for monitoring and control.

### Auto-Interrogation of Database Points

This function searches the connected system and downloads information on points into a file on the driver. The user doesn't have to manually enter points thus reducing commissioning time and increasing accuracy.

**T**he CSI/TAC **web*⚡*i** offers direct access to your CSI/TAC building management system from any web enabled appliance using a standard browser.

The **web*⚡*i** enhances your existing CSI I/NET building management system by allowing monitoring and control of numerous devices, and transmission of information over TCP/IP networks, the Internet and corporate intranets, without the need for I/NET software.

## Benefits

The benefits of the CSI/TAC **web/i** include:

- ⚡ A CSI/TAC tested solution
- ⚡ Web access to your site from any browser
- ⚡ Simple to use operator interface provides usable, easy to manage data
- ⚡ Compatibility with CSI I/NET systems
- ⚡ Single Package "Shrink Wrap" Solution
- ⚡ On-line support
- ⚡ Ability to reuse existing CSI graphic backgrounds

## Service

The **web/i** is the critical tool to enhance your service offering to clients. With a **web/i** installed at a facility, service technicians can respond almost instantaneously to alarms or calls. In most instances they will be able to address the issue without leaving their desk, thus saving money and providing the client with exceptional value.

## Technical Data

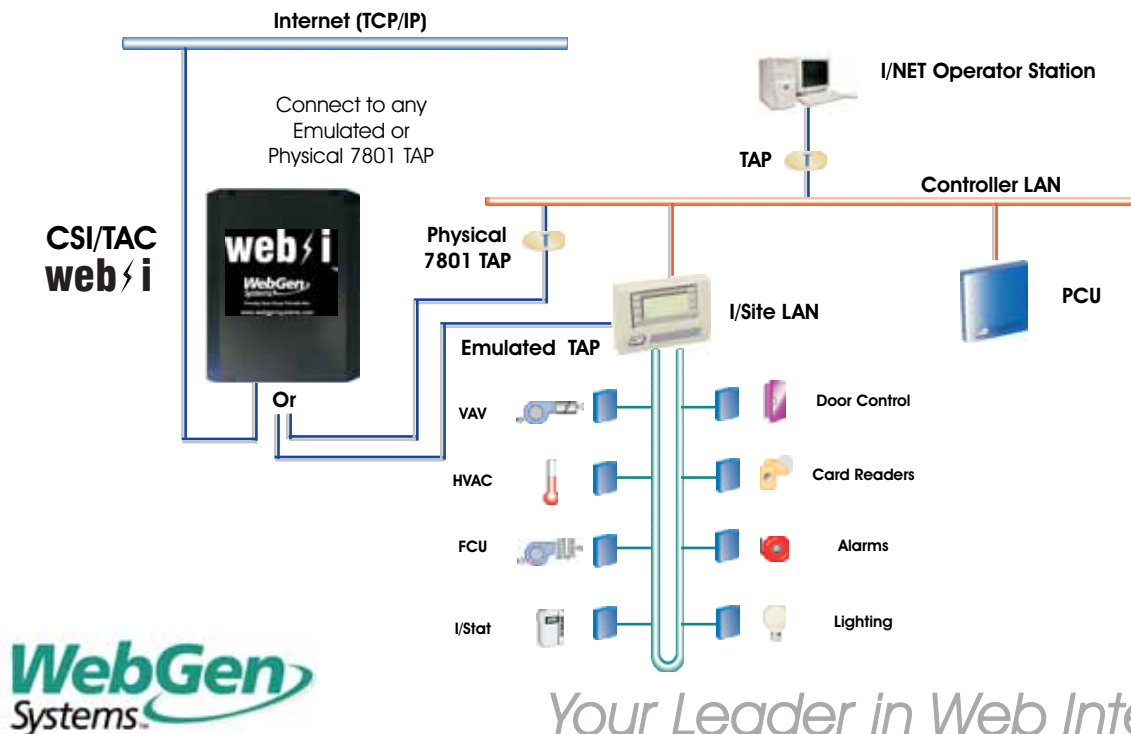

### Interface

128 Mb of RAM standard (Up to 512 Mb)  
256 Mb flash storage standard (Up to 1GB)  
Two (2) RS-232/RS-485 serial port interfaces  
One (1) - 10/100 Mbit/sec ethernet port  
Two (2) USB expansion ports  
Linux operating system  
Integrated firewall  
Packet filtering & logging  
Integrated IPsec (VPN) functionality  
8.0 in x 7.3 in x 2.0 in dimensions

### Display/Functionality

Pre-configured package  
Scheduling  
View status or value  
Modify set-points  
View alarms and acknowledge  
Place points in manual or test
